## Engine Code Stamping Numbers

---

All engines are stamped with an engine ID code, consisting of assembly plant code, production date and suffix code. V8 codes are stamped on a pad just forward of the right side (passenger) cylinder head. 6 cylinder engines are stamped on the passenger side of the block behind the distributor

**Engine ID Code Example: V0101CLJ** - (V = Plant, 01 = Month, 01 = Day, CLJ = Engine Suffix Code)

**Another example: T0830CTY** - (T = Tonawanda, 08 = August, 30 = 30th day, CTY = 1970 396 Camaro, 375 hp, 11.0:1, TH400)

Code	Engine Plant
F	Flint (Motor)
H	Hydramatic
K	St. Catherines, Ontario (McKinnon Industries Canada)
M	GM of Mexico
S	Saginaw Service
T	Tonawanda
V	Flint (Engine)

## Big Block Chevy Cylinder Heads

**Open vs. Closed Chamber** - A good way to describe big-block heads is to categorize them as open or closed chamber. Closed-chamber cylinder heads have small combustion chamber volumes for high compression ratios, with even mildly domed pistons. Open-chamber designs are larger and provide lower compression ratios, so require a much larger piston dome to achieve the same compression as a closed-chamber head.
